Information

For sport suspension and self leveling systems, the spring can only be used if specified in the model listing.

Information

Bei Sportfahrwerken und Fahrzeugen mit Niveauregulierungen ist die Verwendung nur möglich, wenn das betreffende Fahrzeugmodell ausdrücklich aufgeführt ist.

Information

Pour les suspensions de type sport et correcteur d'assiette, seuls les ressorts spécifiés dans le catalogue peuvent être utilisés.

Informazioni

Per sospensioni sportive e sistemi autolivellanti le molle possono essere utilizzate solo se elencate nella lista del modello.

Información

Para suspensiones deportivas y con sistemas de nivelación automática los muelles solo pueden utilizarse si se especifica en el modelo.

A Guide to Coil Spring Replacement

Coil springs support a vehicle's weight and absorb the impact of road conditions. The vehicle's shock absorbers work to regulate the movement of the spring. Together, they make up the vehicle's suspension system, keeping the tyres in contact with the road. Gradual fatigue and corrosion results in gradual wear of coil springs. They will become weaker and over time, will shorten and may even snap. Worn springs will begin to compromise the safety of a vehicle, contributing to longer braking distances, reduced roadholding ability, increased tyre wear and less responsive steering.

Ein Leitfaden für den Austausch von Schraubenfedern

Die Pkw-Schraubenfedern nehmen die Gewichtskräfte des Fahrzeugs auf und wandeln bei unebenem Straßenbelag die Stöße in Schwingungen um. Die Aufgabe der Stoßdämpfer ist es, die Schwingungen der Federn möglichst schnell zu reduzieren. Zusammen bilden sie das Fahrwerkssystem, mit der Hauptaufgabe die Räder auf dem Boden zu halten, um die Lenk- und Bremskräfte auf die Straße zu übertragen. In wenigen Jahren und im täglichen Gebrauch wird die Feder millionenfach gestaucht und unterliegt einer ständigen Materialermüdung, die zu einer dauerhaften Reduzierung der Bauhöhe und sogar zum Bruch der Feder führen kann.

Guide pour le Remplacement des Ressorts

Les ressorts supportent le poids du véhicule et absorbent les imperfections de la route. Les amortisseurs du véhicule régulent les mouvements du ressort. Ensemble ils composent la suspension de la voiture qui maintient les pneus en contact avec la route. L'usure progressive et la corrosion entraînent une détérioration progressive des ressorts. Ils deviendront souples et s'affaîsseront avec le temps et pourront même dans certains cas se briser. Des ressorts usés et corrodés se traduisent par une perte progressive de la sécurité du véhicule : ils rallongent les distances de freinage, réduisent l'adhérence et la précision du braquage. Ils augmentent aussi l'usure des pneus.

Guida alla Sostituzione delle Molle

Le molle elicoidali sostengono il peso del veicolo ed assorbono le irregolarità del fondo stradale. Gli ammortizzatori hanno il compito di smorzare il movimento delle molle. Insieme costituiscono il sistema di sospensione del veicolo, che deve assicurare la sua stabilità e l'aderenza a terra delle ruote. Il progressivo affaticamento e la corrosione sono le cause del deterioramento delle molle; queste, indebolendosi, si possono snervare, o in casi estremi arrivare a rottura. L'utilizzo di molle snervate compromette la sicurezza del veicolo: allunga gli spazi di frenata, aumenta l'usura degli pneumatici, riduce la tenuta di strada e la risposta al volante.

Guía para Sustituir el Muelle de Suspensión

El muelle de suspensión soporta el peso del vehículo y absorbe los impactos producidos por las condiciones de la carretera. Los amortiguadores controlan el movimiento del muelle. Juntos componen la parte fundamental del sistema de suspensión de los vehículos y son los encargados de mantener el neumático en contacto con la carretera. La fatiga gradual y la corrosión tienen como consecuencia la pérdida de eficacia del muelle de suspensión. Se debilita y con el paso del tiempo se reduce su altura y pueden llegar a romperse.

Manufacturing Process

Hot and cold coiling technology is used to produce KYB K-Flex springs. A carefully controlled shot-peening process significantly increases the fatigue life of the coil spring. All K-Flex coil springs are phosphate coated prior to receiving an epoxy powder coating. This process guarantees a tough, durable finish with enhanced resistance properties.

Herstellungsverfahren

Der Drahtstärke entsprechend werden die Federn kalt- oder heißgewickelt in Form gebracht. Die anschließende Kugelstrahlbehandlung sorgt für die höchste Festigkeit des Stahls und die Phosphatierung für einen optimalen Korrosionsschutz. Im letzten Arbeitsgang wird eine Epoxyd-Pulverbeschichtung aufgebracht, für eine extrem haltbare, elastische und schützende Oberfläche.

Process de Fabrication

La technologie chaud/froid qui est utilisée pour fabriquer les ressorts K-Flex est un process de fabrication spécifique contrôlé avec attention qui permet d'accroître les caractéristiques mécaniques du ressort. Tous les ressorts K-Flex sont traités au phosphate avant enduction du revêtement peinture époxy. Ce procédé garantit une finition durable et résistante à la corrosion.

Processo di Produzione

La produzione delle molle KYB K-Flex si avvale di tecnologie di avvolgimento a caldo o a freddo. Un accurato processo di pallinatura incrementa sensibilmente la resistenza a fatica della molla. Tutte le molle KYB K-Flex sono sottoposte a trattamento di fosfatazione prima di essere protette con vernice epossidica. Questo processo conferisce al prodotto finito una elevata durata e resistenza alla corrosione.

Proceso de Fabricación

Los muelles KYB K-Flex se fabrican utilizando tecnología térmica. Mediante un cuidadoso proceso de endurecimiento se incrementa la vida útil del muelle de suspensión. Todos los muelles K-Flex de KYB son fosfatados antes de recibir la capa de resina epoxi. Este tratamiento garantiza una larga duración y una gran resistencia a la corrosión.

Broken Springs

Coil springs should always be fitted in axle pairs to ensure an even ride height and to avoid any pulling to one side when braking. Shock absorbers should be changed at the same time so that the vehicle's suspension is restored to how the manufacturer intended.

Defekte Schraubenfedern

Schraubenfedern sollten immer paarweise getauscht werden, um eine gleichmäßige Fahrzeuglage sicherzustellen und um ein seitwärtiges Verziehen des Fahrzeuges beim Bremsen zu vermeiden. Die Stoßdämpfer sollten in diesem Fall ebenfalls gewechselt werden, um die vom Fahrzeughersteller vorgesehene Fahrwerkssymmetrie wieder herzustellen.

Ressorts Cassés

Les ressorts doivent toujours être changés par paire pour chaque essieu afin d'assurer une conduite stable et pour éviter que la voiture ne quitte sa trajectoire lors d'un freinage. Il est préconisé de changer tous les amortisseurs en même temps pour restaurer les propriétés d'origine de la suspension.

Molle Deteriorate

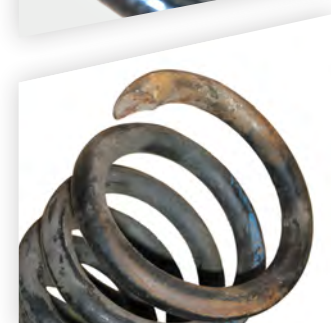

Le molle devono essere sempre sostituite in coppia sull'asse, ciò assicura un'altezza uniforme del veicolo ed evita problemi di coricamento su un lato in frenata. Insieme alle molle è consigliabile anche sostituire gli ammortizzatori, di modo da ripristinare il corretto funzionamento della sospensione, nel rispetto dei parametri definiti dal Costruttore.

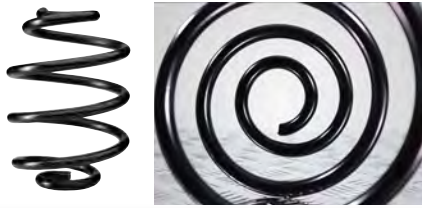

Muelles rotos

Los muelles deben ser sustituidos siempre por parejas en un mismo eje para evitar diferencias de altura en la carrocería y posibles desviaciones del vehículo al frenar. Para conseguir una restauración total del sistema de suspensión deben ser sustituidos también los amortiguadores.

Spring Types | Federtypen | Types de Ressort

Constant Wire

- ◆ Part numbers begin with RX.
- ◆ The wire is a constant diameter, so the spring will compress uniformly at the same time - hence the "linear" rating.
- ◆ This option provides a competitively priced aftermarket design alternative.

Taper Wire

- ◆ Part numbers begin with RJ.
- ◆ Wire becomes thinner towards the end with the coils compressing inside one another.
- ◆ The larger the bump, the more the spring will compress - hence the "progressive" rating.
- ◆ Matches the spring originally fitted to the vehicle.
- ◆ Not produced by all manufacturers.

Konstante Form

- ◆ Artikelnummern beginnen mit RX.
- ◆ Der Federdraht hat einen konstanten Durchmesser, so dass die Feder gleichmäßig zusammengedrückt wird - daher die Bezeichnung "linear".
- ◆ Diese Option bietet eine preisgünstige Alternative für den Aftermarket.

Verjüngte Form

- ◆ Die Teilenummern beginnen mit RJ.
- ◆ Der Federdraht wird zum Ende hin dünner, da sich die Spulen ineinander verdichten.
- ◆ Je größer die Auswölbung, desto stärker wird die Feder zusammengedrückt - daher die Bezeichnung "progressiv".
- ◆ Passt zu der ursprünglich am Fahrzeug montierten Feder.
- ◆ Wird nicht von allen Herstellern produziert.

Fil constant

- ◆ Les références commencent par RX.
- ◆ Le fil présente un diamètre constant, le ressort se comprime ainsi uniformément et simultanément, on obtient alors une action « linéaire ».
- ◆ Cette option offre un design alternatif plus économique pour le marché de la rechange.

Fil progressif

- ◆ Les références commencent par RJ.
- ◆ Le fil est aminci vers l'extrémité du ressort, ce qui permet aux spires de se comprimer les unes dans les autres.
- ◆ Le ressort se comprime de manière progressive.
- ◆ Ce design est celui d'origine utilisé sur le véhicule.

Filo costante

- ◆ I codici ricambio iniziano con RX.
- ◆ Il filo è a diametro costante, quindi la molla si comprime uniformemente nello stesso momento, da cui il comportamento "lineare".
- ◆ Questa opzione rappresenta una alternativa aftermarket dal prezzo particolarmente competitivo.

Filo rastremato

- ◆ I codici ricambio iniziano con RJ.
- ◆ Il filo diventa più sottile alle estremità della molla, così che le spire si comprimano perfettamente l'una dentro l'altra.
- ◆ Più forte è l'urto, più la molla si comprime, da cui il comportamento "progressivo".
- ◆ Questa opzione corrisponde alla molla installata di fabbrica sulla vettura.

Hilo de diámetro constante

- ◆ Las referencias comienzan con RX.
- ◆ El hilo tiene un diámetro constante, por lo que el muelle se comprimirá uniformemente al mismo tiempo. Por ello se denomina "lineal".
- ◆ Esta opción proporciona una alternativa de diseño disponible en el mercado de recambios a precios competitivos.

Hilo de diámetro variable

- ◆ Las referencias comienzan con RJ.
- ◆ El hilo se vuelve más delgado hacia los extremos del muelle, por lo que las espiras se comprimen perfectamente unas dentro de otras.
- ◆ Cuanto más grande es el bache, más se comprime el muelle. Por eso se denomina "progresivo".
- ◆ Este diseño coincide con el muelle de OE del vehículo.

ts | Tipologie di Molla | Tipos de Muelles

Side Load

- ◆ Side load (or banana) springs are curved and when compressed exert a side force on the shock absorber seat which reduces the friction between the shock absorber piston rod and the seal. This not only improves shock absorber response but also extends shock absorber life.

Seitenlastfedern (Bananenfedern)

- ◆ Seitenlastfedern (oder Bananenfedern) sind gebogen und üben beim Zusammendrücken eine seitliche Kraft auf den Stoßdämpfersitz aus, die die Reibung zwischen der Kolbenstange des Stoßdämpfers und der Dichtung verringert. Dadurch wird nicht nur das Ansprechverhalten des Stoßdämpfers verbessert, sondern auch die Lebensdauer des Stoßdämpfers verlängert.

Ressorts à charge latérale

- ◆ Le ressort à charge latérale ou « banane » a une forme incurvée ce qui permet lors de sa compression d'exercer une force latérale sur l'amortisseur afin de réduire les frictions entre la tige et les joints. Ceci a pour effet d'augmenter la durée de vie de l'amortisseur et d'améliorer ses temps de réponses.

Carico laterale

- ◆ Le molle a carico laterale (a banana) sono curve e una volta compresse esercitano una forza laterale sulla loro sede nell'ammortizzatore che riduce l'attrito tra i paraolio e lo stelo. Questo migliora la risposta dell'ammortizzatore e ne prolunga la vita utile.

Muelles de carga lateral

- ◆ Son muelles diseñados para que el amortiguador sufra menos esfuerzos axiales entre vástago y retén. Este diseño mejora el comportamiento del amortiguador y prolonga su vida útil.

Shock Absorbers

The shock absorber is the main element of suspension. It is the link between the wheel and chassis and they are critical to safety. With just one worn shock absorber, stopping distances at 30mph/50kph can increase by up to two metres. Shock absorbers keep a vehicles tyres pushed into firm contact with the road, allowing you to steer and brake safely.

Why choose KYB Shock Absorbers?

KYB is Original Equipment Manufacturer to **1 in 5** of all cars produced in the world. That means you can be sure you're restoring to original or more... never less.

KYB provides technicians with extensive support to find, fit and sell.

KYB's warranty rate in Europe is approximately 0.2%.

Our quality is easy to explain to your customers - we've been experts in hydraulics for over 80 years and we are supplier to some of the biggest vehicle manufacturers in the world.

"Private brands" may be cheaper - but that saving is lost when having to replace a faulty unit.

It is much harder to gain a new customer than to retain the same level of business from a current customer- why risk losing a repeat customer by fitting product you do not know or trust?

KYB Product

Protection Kits

Protection Kits are a critical element for optimal shock absorbers. As the name suggests, they are designed to protect the shock absorber piston rod from any road debris, therefore increasing the shock absorber lifespan.

Why choose KYB Protection Kits?

- ◆ Protection kits increase the life of the shock absorber by preventing dust and moisture from damaging the piston surface and seal.
- ◆ They also protect the piston rod from damage and corrosion from stones and road pollution.
- ◆ The bump stop limits the suspension travel in the compression phase.

Suspension Mounting Kits

Suspension Mounting Kits act as a vital link between the shock absorber and the vehicle chassis.

Why choose KYB Suspension Mounting Kits?

- ◆ Reduce suspension vibration and noise.
- ◆ Improve steering.
- ◆ Eliminate noises while steering.
- ◆ Keep the shock absorber positioned correctly for optimal steering geometry.

For more information about these products, please download our Shock Absorber Catalogue [here](#).

KYB Suspension Solutions

KYB has a number of support tools available, specifically designed to make fitting suspension components easier and quicker.

Support

Fitting Videos

With over 6 million views, **KYB** has created fitting videos for vehicles that are known to be difficult when fitting suspension. These can be found on YouTube: youtube.com/KYBEurope.

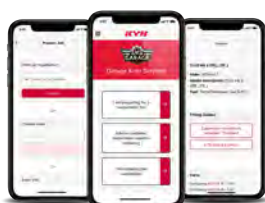

Online Catalogue

KYB part numbers are easy to find using our free online catalogue. Enter either the vehicle model, VIN or the registration number and you will be shown the correct **KYB** part number. As of 2021, **KYB** was awarded a Premier Data Supplier status by TecDoc and was the first shock absorber manufacturer to be awarded this status.

QR Codes

Many **KYB** shock absorbers have a label with a spanner icon and QR Code on them - scanning it with your smartphone camera will give access to part specific fitting instructions and videos.

KYB Suspension Solutions App

KYB has a free App specifically designed to help technicians identify and sell replacement parts for vehicles with worn suspension components.

360° Product Images

KYB has the widest range of 360° product images in the European aftermarket. The user can rotate and zoom in on the image, and compare to the unit being replaced. This ability to compare in detail helps to ensure the correct part is being chosen for the job, increasing efficiency and reducing returns. Now also available on TecDoc.

For more information, visit kyb-europe.com/support-zone

KYB Suspension Solutions App

KYB has developed an App, available to download from the App Store or Google Play, to aid technicians with the fitting of suspension components and to assist informing customers of the dangers of driving with worn suspension. All communication sent from the App can be customised with your logo. Each feature is designed to assist at every stage of the job:

1 Before the job

If a customer needs their suspension replacing, click "advise customer suspension requires replacing"

- ◆ Enter customer's details
- ◆ Select faulty parts and the symptoms.
- ◆ Add an image of the faulty part (optional)
- ◆ Preview the text message and send- these are free and shown to be from the workshop.

The text contains a report. This report, fully branded as the garage, will:

- ◆ Contain all the information inputted by the technician.
- ◆ Show the benefits of replacing suspension
- ◆ A "Call" button- if clicked, they are able to call the workshop directly.

2 During the job

Click "I am preparing for a suspension job".

Enter a registration number, vehicle make or VIN. This will give you access to:

Fitting Videos

Fitting Guides

Part Numbers

There will also be an estimate for the time needed to complete the job, allowing you to quote reliably.

3 After the job

Click "I'm replacing the suspension".

- ◆ Enter customer's details
- ◆ Select faulty parts and the symptoms.
- ◆ Add a before and after image (optional).
- ◆ Preview the text message and send- these are free and shown to be from the workshop.
